

Environmental Justice and Oil & Gas Development in Colorado

Katie Dickinson

Assistant Professor, Colorado School of Public Health

September 21, 2020 from 5:30 - 6:30pm Mountain Time

Dr. Dickinson is an expert in environmental economics studying human response to environmental health risks. Her projects range across the globe from studying malaria in Tanzania, sanitation in India and cooking practices in Ghana. Dr. Dickinson's studies of human responses to natural hazards such as wildfires and vector borne disease risks are especially relevant in these times. Her recent work studies the effect of Colorado oil and gas regulation changes on marginalized communities.

Drinking Water Infrastructure Inequality: Consumer-Centric Solutions

Adrienne Katner

Assistant Professor, LSU Health Sciences Center New Orleans

October 19, 2020 from 5:30 - 6:30pm Mountain Time

Dr. Katner is a leading researcher studying drinking water in New Orleans. Her research is focused on exposure to contaminated water and how federal regulations and public health guidelines affect this exposure. She works with communities to investigate declining private drinking water systems, discovering the lack of regulatory protection in low-income rural communities. Her recent work focuses on investigating and raising
